

Omkar Kadam

Software Engineer | Python Full Stack Developer | AI/ML Engineer

omkark014@gmail.com | 9689687160 | Pune | LinkedIn | Github

SUMMARY

Software Engineer with 2+ years of experience at Amazon and expertise in Python, Django, Flask, React.js, SQL, PostgreSQL, MongoDB, REST APIs, and Cloud Computing. Proven track record of building scalable applications, automating workflows, and delivering data-driven solutions. Strong foundation in software engineering principles, Agile methodologies, machine learning, and computer vision. Seeking Software Development Engineer, Python Full Stack Developer, or AI/ML Engineer opportunities.

PROFESSIONAL EXPERIENCE

Amazon, Business Analyst Trainer (Contract Based) 10/2025 – 03/2026 | Pune

- Conducted practical sessions on requirement elicitation techniques, gap analysis, root cause analysis, and business process improvement.
- Delivered instructor-led training on Agile methodologies, Scrum practices, JIRA, business process modeling, and software project lifecycle management.
- Guided learners in preparing business requirement documents (BRDs), functional requirement documents (FRDs), use cases, and workflow diagrams.

Amazon, Business Analyst Trainer 01/2022 – 07/2022 | Pune

- Trained 100+ students and professionals on Business Analysis, Agile practices, JIRA, SDLC, and documentation standards.
- Designed project-based learning modules covering stakeholder management, requirement gathering, and software delivery workflows.
- Mentored learners using real-world case studies to improve technical understanding and interview readiness.

Amazon, Business Analyst 06/2020 – 01/2022 | Pune

- Collaborated with engineering, operations, and product teams to translate business requirements into scalable solutions.
- Created BRDs, FRDs, workflow diagrams, and process documentation supporting Agile development cycles.
- Improved operational efficiency by 25% through process optimization and data-driven recommendations.

EDUCATION

Post Graduate Diploma in Management, MIT World Peace University 2022 – 2024 | Pune
Information Technology, CGPA: 9.8

Bachelor of Engineering, Savitribai Phule Pune University 2016 – 2020 | Pune
Computer Engineering, CGPA: 7.0

SKILLS

• Python	• JavaScript	• SQL	• React.js
• HTML5	• CSS3	• Django	• Flask
• REST APIs	• PostgreSQL	• MongoDB	• Machine Learning
• Deep Learning	• TensorFlow	• Pandas	• NumPy
• AWS	• GitHub	• Git	• JIRA
• Agile	• Scrum	• SDLC	• OOP

CERTIFICATES

• Python Full Stack	• Python for Everybody Specialization	• AWS Fundamentals	• IBM Cloud Computing
• React Basics	• Responsive Web Design		

PROJECTS

MEDCONNECT, Doctor Appointment Booking Platform 2020 – 2020

- Developed a full-stack healthcare application enabling appointment scheduling and patient management.
- Implemented JWT-based authentication and role-based access control.
- Reduced scheduling conflicts by 85% through real-time slot allocation and tracking. Implemented dashboard-driven appointment monitoring and automated notifications.

IBAS, IMAGE-BASED AUTHENTICATION SYSTEM 2019 – 2020

- Developed a secure facial recognition authentication system as an alternative to password-based login.
- Achieved 95% authentication accuracy through image comparison techniques.
- Improved security while reducing password-related login challenges.

SAFEMASK, AI Face Mask Detection & Monitoring System 2019 – 2019

- Built a computer vision solution achieving 92% model accuracy using deep learning techniques.
- Processed and monitored 10,000+ simulated detections through automated logging workflows.
- Integrated live video feeds, administrative dashboards, and incident tracking.

PUBLICATIONS

Enhancing Security and Privacy in Multi-Cloud Environment (2024) 2024

- Researched multi-cloud security architectures focusing on encryption, identity and access management (IAM), and compliance-driven security controls across AWS, Azure, and GCP.
- Investigated cloud security best practices for protecting sensitive data, ensuring regulatory compliance, and mitigating vulnerabilities in distributed environments.
- Proposed monitoring and access-control frameworks to enhance data privacy, system reliability, and security governance in multi-cloud deployments.
